PID/OSS - 99/65 24 May 1965

| | MEMORANDUM FOR: Assistant for Plans & Development, NPIC | • |
|--------------------------------------|--|-----|
| | ATTENTION : | |
| | FROM : Chief, Photographic Intelligence Division, CIA | in. |
| | SUBJECT : Evaluation of 13X Tube Magnifier | |
| | 1. It is with considerable pleasure that we report our evaluation of the 13 power tube magnifier which you recently supplied to us. This is one of the few P.I. tools which has ever completed evaluation in this Division with unanimous approval. | |
| | 2. The following are some of the comments made by our P.I.'s; a. The best piece of equipment that has ever come out of P&DS | |
| | b. Very good field of viewc. Little noticible distortion | |
| | d. Excellent for scanning KH-4 material e. Looks like one of the best tube magnifiers I have seen | |
| | f. This piece of equipment will become the basic tool for | |
| | every P.I. along with the 2X tube magnifier g. Suggest two of these be issued to each P.I. and the | |
| | development of connecter for stereo viewing | |
| • | 3. As you can judge from the above comments, we will anxiously await further development information on this piece of equipment. Pending information on production cost, our initial estimates indicate an anticipated requirement for 50 to 100 of these units. | • |
| | 4. As usual, we were pleased to have the opportunity to make this evaluation, and appreciate your alertness in anticipating its potential. | 25) |
